SUMMARY

Dedicated and passionate aspirant Mern Full Stack developer having a solid background in the language. I recently graduated with a degree in Bachelor of Computer Application(BCA) from Calicut University, where I learned in-depth concepts of software development, data structures, algorithms, and object-oriented programming. eager to participate to dynamic development teams and use academic skills in a practical situation, renowned for having a rapid rate of learning. adept problem-solving abilities, and a strong commitment to lifelong learning and career advancement.

PROJECTS

HUNGRY   2020

- Hotels can register, log in, and update their food surplus details (e.g., type, quantity, availability).
- The web application sends a notification to registered carriers in the hotel's location.
- Carriers, upon receiving the notification, can log in, view food details, and arrange to collect the excess food from the hotel.

FOODY WEBSITE (HTML,CSS)   2024

- An interface showcasing various food categories and menu items with images and details.
- Includes customer testimonials to enhance credibility and a contact form for user inquiries.
- Utilizes responsive design for seamless access across all devices and screen sizes

CALCULATOR (HTML,CSS,JS)

- Implemented core arithmetic functions (addition, subtraction, multiplication, division) with a user-friendly interface.
- Enhanced user experience through responsive design, ensuring compatibility across various devices and screen sizes
- Utilized JavaScript for input validation, error handling, and interactive features such as button animations
